# About Theo

## a better way to work

### **Who is Theo?**

Theo, Inc. is a software company started by four San Francisco real estate Agents who were constantly frustrated by technical obstacles they encountered in their business.

In short, we founded Theo to create the technology tools and services we wish we had as Agents.

We believe that *Agents are at the very heart of a successful industry*, and should have tools every bit as good and powerful, if not more, than those currently being developed for their Clients.

### **What are we building?**

Theo is building a suite of *integrated applications and services* that dramatically improves the ability of Agents - indeed any real estate professional - to deliver an enhanced value-add service and experience to Buyers and Sellers.

See the additional handouts for information on our two current products: TheoTour (for iPhone) and ProtoTheo (for iPad - in beta).

You're a Professional.....You Deserve Professional Tools!
