

TUESDAY TECH TIPS

A weekly update of real estate related tech news and tips

Need a change?

If you are a real estate agent in the Danville, San Ramon, Alamo, Diablo, Dublin and Concord areas and you'd like to work with a broker that "gets" technology, come and talk with me!

I am the manager of Berkshire Hathaway Home Services Drysdale Properties offices in Blackhawk, Danville. and Concord. Let's explore the possibilities!

The Blog

For the past 9 years I have been publishing a weekly blog for real estate professionals. Each week I find some new app, software program or some new gadget that I think will be helpful to you in your business. Occasionally, I slip in a little sales training that I think you would find useful too.

And on rare occasions I publish a rant about something that rubbed me the wrong way. Check it out:

Beautiful, Free, Single Property Websites

If you are new to this newsletter you may not know that I am a big fan of free things. My long time readers know that free tools that deliver the same results as expensive tools are my passion!

This week I have a great free tool for creating and hosting a single property website called Enviar.

I contacted the developer of the site and asked him a few questions. Here are his answers: *"My name is [Esteban Santiesteban](#). I'm the founder and creator of Enviar. I'm a Cuban-American, programmer, Miami raised. Graduated from FIU with a BA in CS, went on to work for a few companies after college. As I grew intimate in some industries I started noticing the challenges of it. I built Enviar to try and solve some of those challenges.*

Here are some useful Links

(For when I can't be there)

Please share this newsletter with your friends!

The philosophy at Enviar, is pretty simple. We are relatively new to the scene, so for now If we can make someone's day just a little more efficient, profitable and maybe enjoyable, we're doing something right.

Where do I see the company in a few years?

Hopefully the bank. Haha, it has taken quite a bit of my time. As far as growth, I built the app to be very flexible by design. And our idea is nothing too niche. We can easily expand to other markets. Everyone that can profit from having beautiful, responsive, and performing landing pages, generated on-demand and next to instantly with little technological and financial struggle, we're here to help."

So, what is Enviar? Quite simply it is a web based tool that allows you to build beautiful websites that look good on any device by using a fill in the blanks questionnaire. Currently it's set up as a single property web site creator, but as you can see from Esteban's comments above, he has plans for additional uses as well.

But for now, if you need a single property website, that looks good and is FREE, you need to go to <https://enviar.io/> right now and check it out!
